

StrongPRO

Making your fleet unstoppable

Innovating the indestructible battery

StrongPRO is Exide's all-new truck battery. It features a next-generation HVR® (high vibration resistance) design, and comes with Carbon Boost™, Exide's smart solution for reduced acid stratification, faster recharge, and increased cycling.

Since the AdBlue® tank was introduced (Euro 5/6), truck makers have moved the battery to the rear chassis, where increased vibrations cause early battery failures. Exide's unique HVR® technology prevents this, and enabled StrongPRO to pass the extreme vibration tests under the new European V4* standard – likely the first on the market!

StrongPRO means lower risk of breakdowns, more starting reliability, and longer lifespan – providing the lowest total cost of ownership for your fleet. As a leading OEM supplier, Exide brings the latest technology straight to the aftermarket.

NEW!

Benefits

- › Extremely robust – latest HVR® technology
- › Ideal for chassis-end location, particularly Euro 5/6 trucks
- › Carbon Boost™ for faster recharge and longer endurance
- › Ideal for long-haul trucks with comfort equipment to support “life on board”
- › Maximum starting reliability after overnight stay
- › OE experience inside
- › First class safety features
- › Maintenance free – no topping up
- › Optimal total cost of ownership (TCO)
